ABOUT THE COMPANY

Tiger's Eye Geo and Environ is a Sustainability Consultancy. We support both public and private sector decision-makers in undertaking operational and development planning which is cognisant of natural capital as the supplier of services on which society and the worlds' economies have come to depend.

We also develop and implement green economy projects that build the capacity of people and supports the role of the natural environment in sustaining vibrant economies and human well-being. Building resilience to change – both known and unknown - and supporting greater efficiencies in resource use are a major part of what we do.

At Tiger's Eye Geo and Environ, we believe that better decisions today will result in a better tomorrow.

OUR MISSION & VISION

We have a vision of a Future that Works – for people, for businesses, for the economy, and for ecological systems. We acknowledge the difficulty of achieving a “perfect balance”, where all priorities are met, and where everyone benefits. So, we strive to bring a combination of innovation, science and collective wisdom into the process of supporting decision-making, developing plans and strategies, or writing policy.

Vision

“To obtain the hallmark for quality services, technical excellence, reliability and safety”

Mission

“To provide innovative & Economical Designs and to Ensure Safety & ease of construction”
